SFP News

For the past few months, we've been busy behind the scenes, measuring progress toward our T75 goal while engaging the industry in helping us make gains in each seafood sector. Have you seen the T75 sector reports that have been coming out steadily? To date, we've released [reports](#) on squid, fresh and frozen tuna, octopus, coldwater crab, reduction fisheries, and snapper/grouper sectors.

We also recently released our [2017 annual report](#), which describes the thinking behind T75 as well as our efforts to increase transparency in the industry through the Ocean Disclosure Project. Just last week we announced that the US retailer, Meijer, joined the ODP.

Building more momentum towards reaching our T75 goals will be the focus of SFP's Global T75 event in February, 2019 in Miami, FL. You can learn more about it [here](#).

We are encouraged by the companies that have stepped up to take part in T75. Many have shared their thoughts on the subject in recent [testimonials](#). We hope that those of you who are general supporters of sustainable seafood outside of the seafood industry know that the T75 campaign is aimed at benefitting everyone who relies on a healthy seafood supply. Follow us on social media (see links below) to learn more. We welcome your feedback on our programs and publications. It's always good to hear from you.

Sincerely,

Jim Cannon

CEO of Sustainable Fisheries Partnership
