SFP News

In the last few weeks of 2018 we are keeping the momentum going on our [Target 75](#) campaign. You'll see in the right column of this newsletter how many new sector reports we've published recently. The reports give us a starting point to discuss improvement efforts necessary in the seafood sectors we're focusing on the most. As we move forward, you'll see updates on these sectors along with a call for everyone to get more involved in helping us raise the bar on seafood sustainability.

In 2019, we'll be increasing our outreach through social media and we're launching a T75 Champions program to showcase outstanding commitments to sustainability. We would love to add your company's name to our list of [T75 Champions](#), so please look into this opportunity. This all ties in well with the UN's Sustainable Development Goals, especially [SDG goal #14](#), which focuses on ocean resources.

For now, follow us by clicking on the social media links below so we can keep you up to date. Any message you re-post helps us amplify our message.

We wish you the best for the end of this year and for 2019. Thank you for your continued support of SFP.

Sincerely,

Jim Cannon

CEO of Sustainable Fisheries Partnership
